My mission is to find a [used BMW dealer London](#) who can locate me an X5 3.0d Auto in Carbon Black. However, it has to be low mileage, with professional sat nav system, Harmon Kardon sound and rear DVD players for the children. I am very specific about the car I want as it is a huge purchase for me and I want to keep it for at least three years. I have searched every day on Autotrader to track down such a vehicle but to no avail. There is a car dealer in Kent called Big Motoring World who have over 500 used BMW in stock. I may call them to see if they have any due in to their stock.
